### **Objective**

To become part of a team of nuclear medicine technologists in a metropolitan hospital

### **Professional Experience**

**2006 – Present: Nuclear Medicine Technologist, Devon Freedom Hospital, Exeter**

- Explain to patients the purpose in using radioactive injection for the gamma detecting camera to work and assure its guaranteed safety.
- Administer the radioactive tracer by oral means or intravenously as may be prescribed by the oncologist.
- Ensure that immediate hospital staff and patients are protected from any stray radioactivity.
- Ensure correct physical positioning of patient before the gamma camera and monitor the patient throughout the entire procedure.
- Operate the equipment and conduct computer-based analysis to produce medical images.
- Upload images into PC for viewing by physicians and oncologists.
- Perform minor or routine adjustments and repairs or adjustment to the gamma camera equipment as necessary

### **Skills**

- Excellent oral communication skills
- Excellent psychological and interpersonal skills dealing with mental patients.

### **Achievements**

Awarded Employee of the Year in 2002 and 2004 for consistent perfect attendance

### **Education**

2004 – 2006: Associate in Nuclear Medicine Technology, Liverpool John Moores University
