Objective

After working in a foreign country, I am returning to seek employment to continue my profession as an avionics technician specializing in B747 Boeing avionics of any series

Professional Experience

2005 – Present: Avionics Technician “A”, Saudi Arabian Airlines, Jeddah

- Perform test routine, repair and overhaul at the shop level on avionics navigational equipment on the B747, 200 and 400 passenger aircrafts.
- Perform tests and minor repair on Airbus A300, A320 and A340-800 aircrafts.
- Comply with repair procedures required by avionics manufacturers
- Comply with mandated maintenance standards
- Participate in quality and productivity improvement programs on the shop floor.

1999 – 2005: Aircraft Mechanic Technician “A”, Ryanair, Stansted

- Test and repair avionics instrumentation on the B737 400 series.
- Overhaul avionics instruments in accordance with UK-CAA and US-FAA avionics maintenance standards

Skills

- Above average computer literacy in using automated aircraft maintenance parts inventory and job productivity systems.
- Excellent communication and interpersonal skills in English to work in a team.

Achievements

Cited Employee of the Year in 2006, 2008 to the present for perfect attendance and consistent high repair output performance r throughout each of these years

Education

1997 – 1999: BS Aeronautic Engineering (undergraduate), University of Bristol
